YOUR STRATEGIC PARTNER IN SEAL SUPPLY

The Freudenberg Group was founded in 1849 and is still owned by the approximately 300 descendants of the company founder. The resulting financial stability and social consciousness are decisive success factors that create trust. Today, Freudenberg is a global, broadly diversified Group that is divided into Business Groups that operate in a wide variety of different sectors. The company has always been considered an innovation and technology leader, from Vileda® brand household products to technically complex sealing solutions.

Freudenberg Sealing Technologies (FST) is the largest Business Group in the Freudenberg Group and part of the Seals and Vibration Control Technology Division. It is a supplier as well as a development and service partner to customers in a wide range of market segments, such as the automotive industry, civil aviation, mechanical engineering and shipbuilding, the food and pharmaceutical industry and the agricultural and construction machinery industry.

Starting with the Simmerring® Freudenberg developed in 1929, FST now has a broad, continuously customer-oriented product portfolio of premium sealing technology for highly demanding applications – from tailor-made individual solutions to complete sealing packages. The company benefits from more than 170 years of engineering and materials experience in the research, development and introduction of innovative product and process solutions.

Freudenberg Sealing Technologies rounds off its portfolio with complementary industry standard solutions from the Dichtomatik product brand. The two-brand strategy is part of Freudenberg Sealing Technologies' comprehensive service portfolio and guarantees a full range of seals and product-related services. Dichtomatik products are manufactured by certified suppliers and are available in numerous seal sha-

pes and materials. They are suited for moderate operating conditions in static and dynamic applications and for fluid seals in a wide range of market segments. These include the hydraulics industry, the wind power plant industry, agricultural machinery and plants and components for general mechanical engineering. Dichtomatik brand products are also available in certified materials for use in more specific applications, such as in the food industry.

Freudenberg Industrial Services offers technical services such as the preparation of drawings, radial force measurements, comprehensive quality and material documentation as well as material modifications and testing to ensure that all seals function reliably, even in customized applications. Furthermore, local availability ensures short distances and fast response times to best serve customer needs.

FST serves the entire sealing market with this complementary product portfolio and thus meets all market requirements – quickly, reliably and from a single source.

COMPETENT AND STRONG LOCAL PARTNER IN AUSTRALIA

GLOBAL EXPERTISE WITH LOCAL REPRESENTATIVES

Freudenberg Sealing Technologies acquired Ludowici Sealing Solutions in 2015 which was originally founded in 1858 by Johann Carl Ludowici. In addition to the headquarters in Brisbane there are three additional offices in Australia. FST Australia is one of the leading seal suppliers in Australia, servicing a broader range of market sectors.

By integrating into Freudenberg Sealing Technologies, FST Australia has joined the broad portfolio of FST including the Freudenberg, Dichtomatik and Corteco brands, now all available from one source and one local warehouse in Australia for maximum availability and speed.

MULTIPLE BRAND STRATEGY TO MEET ALL CUSTOMER REQUIREMENTS

FST Australia offers both premium standard and customised seals from Freudenberg as well as third party industrial standard Dichtomatik seals. We also offer Automotive aftermarket seals through Corteco. This unique combination of branded product ranges enables you to capitalise on a broad-based alignment of technically complementary products.

SEALING SOLUTIONS FOR NEARLY EVERY MARKET SEGMENT

As a full service provider, FST Australia offers sealing solutions for a wide variety of market segments such as Food and Beverage, Heavy Industry, Agriculture, Hydraulics and many more.

YOUR ADVANTAGES AT A GLANCE

- Complementary product portfolio
- Full range of premium and industrial standard quality seals
- Single point of contact for several Freudenberg brands
- Local warehousing
- Freudenberg Xpress® manufacturing service for machined prototypes, replacement parts or small series
